### Microneedling for Collagen Stimulation

Microneedling works by encouraging the your own skin to make healthier cells and increase its collagen and elastin by creating small, safe micro-injuries to the treatment site.

It has been clinically successful in improving various complaints for almost all skin types and is a non-invasive treatment to help attain a smooth, rejuvenated complexion.

\*Treatment plans consist of 3-4 sessions and are highly advisable to achieve the best results.

Once a treatment plan is completed there are a vast number of benefits experienced:

Improved pigmentation | Improved texture | Improve scar texture | Smaller pores | Lifted and tightened skin

The use of skincare products are proven to work more effectively alongside this treatment. (Skinbrands)
